

Thera-Band® Stretch Strap Fact Sheet

General Description

The **Thera-Band® Stretch Strap** is a revolutionary replacement to static stretching devices. It supports classic static stretches, plus introduces more effective dynamic stretches. When used with our dynamic stretches, it helps improve flexibility during rehabilitation.

Market Positioning

- More effective, dynamic stretch will help get patients and clients back to their regular activities faster
- An essential tool for clinicians performing stretching, which is one of the first and most common treatments during rehabilitation
- Ideal for use in-clinic and as part of a clinician-prescribed home exercise program
- Dual purpose strap enables complete replacement of static stretching devices by supporting *both* static and dynamic stretching

Packaging Details

Part #	Description	Case Qty.
22300	Bulk – Case of 12 in Individual Poly Bags	12

Features & Benefits

- **Revolutionary *elastic* design**
 - Provides more effective, dynamic contract-relax stretch than traditional static straps
 - Slight “give” supports a more comfortable static stretch

- **Multiple loops with numbered marks**
 - **Gradual stretching** of major muscle groups and extremities
 - **Immediate feedback on progress** allows patients to receive visual feedback as an indication of improvement
 - **Clear, accurate instructions** enable practitioners to clearly communicate goals and limits to better guide patients
 - **Increased safety** through better instruction when used at home
 - **Varied loop sizes** for foot-related conditions
